# ABOUT US

Dellner Polymer Solutions provides technologically advanced vibration control, rubber fabrication and bonding solutions for a global market. Our head office based in Burton Upon Trent, England, provides access to all major road and rail networks ensuring ease of distribution throughout the world.

Technical innovation is integral to our DNA. With over 150 years' combined experience as Silentbloc and Woodville, our expert engineers work in close partnership to overcome not just today's challenges, but tomorrow's too. Our mission is to be the market leader in technical development with qualitative and flexible solutions. We have ambitions to grow, and to increase customer satisfaction throughout this journey.

# OUR VALUES

COMMITMENT • INNOVATION • TEAM • JOY

They guide us in our everyday work. Our values are the compass in everything we do, they guide our behaviour and interactions with our colleagues, customers, and partners.

# OUR CUSTOMERS

We provide product solutions to many clients of varying sizes across the UK and overseas.

We're extremely passionate about what we do and our team pride themselves on providing a friendly and responsive service, which we feel is reflected in most of our new clients hearing about us through personal recommendation.

# RUBBER TO METAL SOLUTIONS

Dellner Polymer Solutions is at the forefront of technological innovation that delivers real, practical benefits for our customers. Here, you can find out all about our intelligent solutions and product innovations:

## Mechanical Innovation

Modular products for easier repair and replacement.

- Stabilisers

### Sectors:

## Material Innovation (Ndure)

Lightweight, resilient materials for longer life.

- Mounts & Springs

### Sectors:

## Thermal Energy Management System (TEMS)

Managing heat production for enhanced performance.

- Bushes & Ball Joints
- Fabrications & Assemblies

### Sectors:

## Data to Knowledge (D2K™)

Harnessing energy for system optimisation by capturing thermal energy from vibration and transforming it into electrical energy.

### Sectors:

## Custom Engineering

Bespoke solutions to meet the toughest challenges.

### Sectors:

## Silverline™ Bearings

Our proprietary, high-performance, water-lubricated bearings.

### Sectors:

# HAND BUILD SOLUTIONS

We are experts in the processing and fabrication of engineered textile laminates. Most of our solutions are custom designed to meet our customers' bespoke requirements. Here are some of things we can do.

## Fabricating

Flexible rubber fabrications, structures and integrated semi-rigid solutions

### Sectors:

## Hand Built Inflatables

High pressure inflatable parts for clamping and sealing.

### Sectors:

## Rubber Moulding

Moulded parts and components.

### Sectors:

## Mandrel Forming

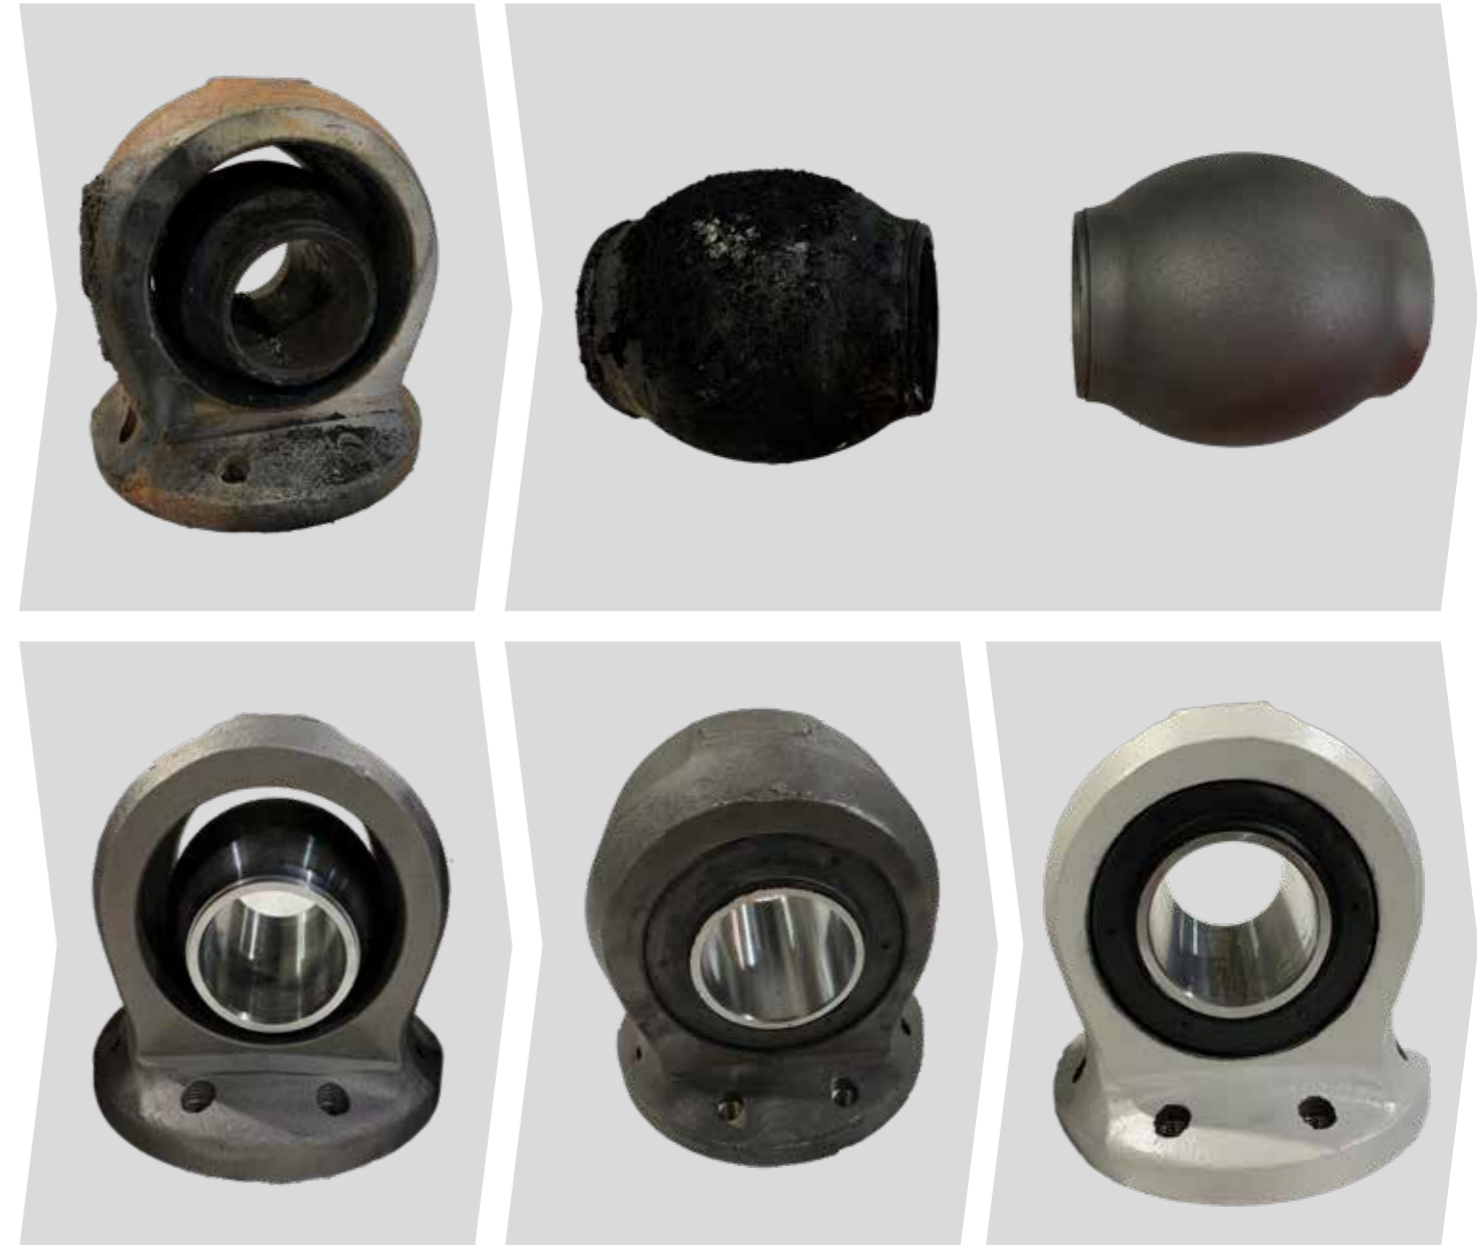

Autoclaves for flexible constructions and mandrel built bladders.

### Sectors:

## RECOVERING A SUSTAINABLE FUTURE

## WHAT ARE WE DOING TO REDUCE OUR IMPACT ON THE PLANET?

- ▶ Recovering steel from after market items.
- ▶ Reducing carbon footprint of the supply chain.
- ▶ No effect on the viability of the product.
- ▶ Reducing the cost to the customer.
- ▶ Reducing the impact on the environment for the life of the vehicle.
- ▶ Working towards ISO 14001:2015 certification.

# GET IN TOUCH

It's easy to get in touch with one of our experts, whether it's for a technical question or a business enquiry. Simply contact us using the details below.
